

**EASY SPA CARE®**  
**CHLORINE SHOCK**

**Technical characteristics / Composition:** Sodium dichloroisocyanurate, dihydrate (100%).

**CAUTION:** Do not swallow. To avoid risks to human health and the environment, follow the instructions for use. Do not mix it with other products. Use preferably before 2 years from the date of purchase.

**Instructions for use**

The dosage depends on the weather and operating conditions and can vary widely. We recommend shock chlorination at the beginning of each season, every time you change the water in the spa and when the water loses its crystalline appearance. Add it directly to water, preferably in the center of the spa or just in front of the skimmer for faster dissolution.

**Dosage for private spas:**

Initial use: **Add 40gr for every 1,000 lt of spa water.**

For maintenance: **Add 30gr for every 1,000 lt of spa water, once a week.** After using the product, the spa can be used as long as the free chlorine level returns to normal 2-4 ppm.

**Dosage for public spas:**

Increase the dosage so that the chlorine is between 3-5 ppm.

Initial use: **Add 50gr for every 1,000 lt of spa water.**

For maintenance: **Add 40gr for every 1,000 lt of spa water, once a week.** After using the product, the spa can be used as long as the free chlorine value returns to normal 3-5ppm.

**Do not swallow.** To avoid risks to human health and the environment, follow the instructions for use. Do not mix it with other products. Use preferably before 2 years from the date of purchase.

**Hazard and Precaution Statements**

**H302** Harmful if swallowed. **H319** Causes severe eye irritation. **H335** May cause respiratory irritation. **H410** Very toxic to aquatic organisms, with long lasting effects.
